**NEW
FLUSH-FIT PELMET
& TRACK SYSTEM**

ANOTHER FIRST FROM THE INDUSTRY INNOVATORS

We are renowned as “The Industry Innovators” and our latest innovation builds on this reputation, with an exciting NEW track and pelmet system destined to revolutionise the way garage doors are installed. Our NEW fully integrated FLUSH-FIT pelmet system forever does away with “tacked on” pelmets that have always looked like an afterthought.

“Street Appeal” can have a huge impact on the value of a home and for over 30 years the void created between the ceiling and the garage door has been an unsightly problem for the appearance of homes.

Well not anymore...

- Our New FLUSH-FIT pelmet system integrates into the front face of the door providing a beautiful seamless appearance
- Combined with our TUFF-TRACK system the pelmet height is reduced and only a single horizontal track is required providing a neat, uncluttered installation
- Eliminates problems with ceiling gaps above traditional pelmets and the track system integrates our unique side seal system sealing the gap between the door jamb and door track
- Optional FLUSH-FIT rebate moulding incorporates the pelmet system into the building, eliminating interference with eave mouldings (only available on new construction)
